

## **Training For Skills**

### **1. Health and Safety**

We have an annual training programme for all our employees, this ensures that we are compliant with current legislation.

We employ an independent Health and Safety Advisor which endorses our commitment to the welfare and well being of our employees, our clients and the general public.

### **2. Business Training**

Our approach to business training programmes is fundamental, we encourage all staff to develop their skills offering I.T., Project Management and Microsoft Courses, Presentation and Assertiveness Training.

### **3. Apprenticeships**

We are a progressive company who have for over 35 years employed and still employ local apprentices combining site work with college training.

We monitor and help develop their key skills which underpins the ultimate achievement of the relevant NVQ Qualification.

Young people are clearly vital for the future of our company, we therefore encourage and employ trainees in education for work related experience.
